

2019 Michigan Program INFO Sheet

Artificial High Directional Workshop; Understanding the Arizona Vortex

June 9-15, 2019 - Southfield & Metro Area

An advanced skate block evolution
from the previous Vortex workshop
in Auburn Hills

*HOSTED BY: Michigan Urban Search & Rescue Training
Foundation*

Instructor - Reed Thorne - Ropes that Rescue

PLEASE NOTE: THIS TRAINING IS IN HIGH DEMAND. MUSAR IS
HOSTING THE PROGRAM SO AGENCIES CAN SAVE ON THE TRAVEL
EXPENSES ASSOCIATED WITH ATTENDING OUT-OF-STATE TRAINING.

PLEASE NOTE THAT THIS SEVEN-DAY PROGRAM STARTS ON SUNDAY

This program is appropriate for both Technical Rescue Teams & USAR Task Force members. It provides detailed information relative to the use of any manufactured high directionals in both industrial and wilderness settings.

ONE VERSION OF THE "DOORTOX", A SET-UP THAT IS PARTICULARLY USEFUL IN ELEVATOR SHAFTS.

This program concentrates on artificial high directionals in general and is not intended to teach highlines, advanced pulley systems, or offsets, although some of these are discussed. Physics, as it relates to high directionals, is covered both in the manual provided and during several in-depth lectures. Numerous venues allow for plenty of hands-on application.

TUITION FOR THIS SEVEN-DAY PROGRAM IS \$1250.

**TO REGISTER, SIGN UP ON THE WEBSITE,
WWW.MUSARTF.ORG**

ENROLLMENT IS STRICTLY LIMITED TO 12.
